APR 2019 - JUN 2020

- CodeIgniter Framework.
- PHP Programmer writing MLM Sales website back end and frontend code.
- Integrating with eCommerce-based MLM Projects.
- Integrating Blockchain Deposit, Withdraw, and Exchange functionalities.

PROJECTS

Crypto Exchange Project - Arthbit:

Arthbit is a Cryptocurrency exchange project that includes a Trading Platform to Buy, Sell, and Store crypto. Features like crypto deposit, withdrawal, and trading techniques are implemented in arthbit like the popular crypto exchange "Coinbase". Arthbit includes a lot of new Bep-20-based tokens. I had used Third-party and own blockchains.

Crypto Exchange Project - CPM:

CPM is a Cryptocurrency exchange project that includes a Trading Platform for P2P, Buy, Sell, and Stake crypto. Features like crypto deposit, withdrawal, and trading techniques are implemented. CPM is built with the latest technologies like Angular, Node, and PHP. I have implemented coinbase and binance API's.

MLM Projects:

I have developed MLM Based eCommerce projects. And, it has a lot of popular MLM customized plans (like a Binary, Unilevel, and Force matrix). Deposit and withdrawal are implemented in the project and it is one of the most complicated projects, which I have completed successfully within the projected time excluding all code-side errors.

HYIP Investment Projects:

HYIP is a Cryptocurrency Investment project, which includes the deposit and withdrawal methodology. And, I have completed it up to two months ahead of the project delivery schedule.

Crypto Exchange Project - Moonex:

Moonex is a centralized cryptocurrency exchange/trading platform. Where users can buy, sell, store and exchange cryptos within the moonex exchange. Referring to the Coinbase exchange as a reference, I have developed a crypto deposit, withdrawal, and trade process like Coinbase. Which includes seamless crypto deposit and withdrawal processes. I can proudly say that the project was completed by me within two months of the scheduled delivery time.
